About the Product: JM BUSHA CashPlus Fund

This is a fixed-income product designed and managed to give secure good returns to investors – individual and institutional, which can be structured as part of asset-liability management to match clients' requirements.

Product Description

The JM BUSHA CashPlus Fund is an actively managed money market fund, which invests in high quality fixed-income instruments with a credit rating of at least A. Credit risk is managed through fund allocation. The fund provides daily liquidity of about 15%, but 100% liquidity could be provided given the investments' quality and adjustment for rates' movements. Maximum weighted duration is 180 days.

Investment Securities

Commercial paper, promissory notes, Bankers Acceptance, Treasury Bills, FRNs, FRAs and swaps and other money market instruments. The maximum tenor of the instruments allowable is 18 months.

Investment Strategy

The strategy is based on riding the yield curve and investing the funds relative to the benchmark structure. Economic indicators and monetary policy are important considerations in the investment management process. Liquidity of investment securities is an important factor in our strategy.

Commentary & Notes

Cash returns remained stable with a marginal increase this month. However due to the weakening of the Rand and the increase in inflation rate as a result of an increase in oil prices and VAT, we anticipate an increase in cash returns in the near future as a repo rate hike looms amid inflation pressure.
